"The Environment and Your Money"

GUEST SPEAKER

Mr Morten Strange
Independent Financial Analyst, Singapore

Mr Morten Strange (65) is a Singapore-based financial analyst. He has a wide range of experiences behind him: Before entering finance he was mainly dealing with resources extraction and later nature photography and writing, editing and publishing; however, the environment in all its facets has always been at the core of his activities.

He currently works as an independent financial analyst and writer; however, he doesn’t charge for financial advice, in the firm belief that finance and money doesn’t mix well! He is the author of Be Financially Free: How to become salary independent in today’s economy (Marshall Cavendish, 2016; reprinted with updates 2017).

INTRODUCTION

The environmental predicaments we face today do not really need repeating, but on this occasion we will recap a few of them anyway! The problems are massive. However, it is also a fact that there are paths we can take to address some of the key issues: We can reduce population growth, move away from fossil fuel dependency to clean energy, reduce our environmental footprint, save threatened biodiversity and restore damaged ecosystems. We know how to do these things, and many parties are working on solutions right now, both in governments and in the private sectors. All these efforts are noteworthy and absolutely laudable. However, what if they are too little too late?

The economic experts out there do not agree on many things, but they all agree that when financial, environmental and associated social unrest sets in, the poor will suffer the most. So don’t be one of them! In this talk, the speaker will show you how to position yourself financially under these uncertain circumstances.

FREE ADMISSION

ABOUT THE MEM PROGRAMME

The Master of Science (Environmental Management) (MEM) programme is a multi-disciplinary integrated programme offered jointly by nine faculties and schools in the National University of Singapore (NUS), demonstrating its broad-based approach to education in the field of the environment. It is hosted by the School of Design and Environment (SDE).
